

Geography

*Be the
Best You
Can Be.*

To investigate human and physical characteristics locally and around the world. To understand how our lives are shaped by and impact on the environment. To inspire children to think about their own place in the world, their values, and their rights and responsibilities to other people and the environment

Use maps to develop their understanding of features found in environments and habitats around the world.

Recognise the effect of weather and climate on physical and human features around the world.

Analyse evidence and draw conclusions, expressing their own views about people, places and environments.

Understand the interaction of physical and human processes in developing the formation and use of landscapes and environments.

Integrity

To understand and respect differences between places, people, cultures and customs around the world.

Curiosity

To use research and discussion to ask and answer questions about their own surroundings and the wider world.

Courage

To take responsibility for how they can rise to the challenge of protecting our wider environment as an individual.

Perseverance

To develop the skills and vocabulary of a geographer.

Collaboration

To work together to treat our local environment with respect.

Community

To consider ways to have a positive impact on the sustainability of the environment through how we use food and natural resources.
